SUMMARY

Motivated and detail-oriented Fullstack Developer with a strong foundation in HTML, CSS, JavaScript, React and Node.js. Passionate about building responsive, user-friendly web applications with clean and maintainable code. Skilled at working both in teamwork and alone and continuously improving through self-learning and practice. Strong analytical thinker with good problem-solving abilities, a keen eye for details and a good sense of humor. Highly responsible, adaptable, always eager to take on new challenges in web-dev.

PROJECT EXPERIENCE

Read Journey, Link [React(Hooks, Routers, Redux), JS, CSS, Vite]
A responsive and adaptive application with auth for tracking your reading with capabilities of making your own library, updating your reading history, tracking the amount and speed of pages read using the existing API

Phonebook, Link [React(Hooks, Routers, Redux), JS, CSS]
A phonebook app connected to mockAPI. Allows to add, delete, search contacts from a custom-made back- end API.

Yacht Club, Link [HTML, CSS]
A website of a yacht rental company. Role: Developer
Responsible for a hero section markup, styles, as well as section's adaptive and responsive layout.
